The world's leading jet tender specialists.

From the moment our first tender took to the waters in 1996, the Williams name has been a byword for engineering excellence and pure boating pleasure.

Since then, we've expanded the fleet so that owners of all yacht sizes can experience what it means to own a Williams.

Which, depending on your mood, might be ferrying guests in the lap of luxury. Or it might be pushing the throttle and turning your tender into a high-performance ski boat.

However you use it, every Williams tender is the result of a single goal: to make the very best boats possible so you can have the very best time on the water.

Williams Jet Tenders. Our passion is your joy.

Build your tender at williamsjettenders.com

Ensuring your tender and yacht are made for each other.

The yachting experience begins and ends with your tender. That's why every Williams tender is built to maximise comfort, style, practicality and performance – the same qualities you look for in your yacht.

But we push things a little further. Our decades-long relationships with yacht builders mean our tenders work seamlessly with their garage systems and are an ideal match for your yacht's size and performance.

Which means, not only are our tenders built with the world's best yachts in mind, the world's best yachts are built with our tenders in mind.

An icon perfected.

TURBOJET

The TurboJet changed the industry when it was launched in 2005, with its groundbreaking design and powerful 4-stroke engine. It's a formula we've updated again and again, upgrading the TurboJet's features and streamlining its design into this most modern of icons.

Today, the TurboJet is powered by a 90hp Rotax ACE 903 engine, which delivers exceptional performance and fuel efficiency. Combined with redesigned upholstery for the ultimate in comfort and an improved hull delivering supreme handling, the TurboJet is better – and more iconic – than ever.

Jack of all trades, master of everything.

With its mix of grace, practicality and power, the TurboJet is not only incredibly versatile, it's a tender that comes packed with features to deliver a first-class experience.

Its BRP petrol engine offers improved performance and efficient fuel economy, so it's perfect for longer journeys when it's not just about getting to your yacht and back. And so you never lose your way, the TurboJet's optional Raymarine chartplotter helps you navigate safely.

Every TurboJet comes with comfortable SeaDek flooring and a bathing platform, ideal for when you want to turn the engine off, relax and go for an impromptu swim.

High-performance, powerful and fuel-efficient BRP Rotax engine.

Power limiter switch helps new drivers learn the ropes safely.

Improved hull and responsive propulsion system deliver pinpoint accuracy at any speed.

Its accessible size means the TurboJet fits most luxury yachts.

Safe, high-torque jet propulsion system with no exposed propeller.

Customise your tender with a range of colour options, fittings and electronic equipment.

“ I know exceptional performance when I see it, and that’s exactly what Williams has delivered.

Eddie Jordan, F1 entrepreneur and DieselJet owner.

TURBOJET

285

The TurboJet 285 fits into smaller garages and bathing platforms of most 12–16m (39–52ft) yachts, so it's ideal for smooth trips to the quayside for supplies or a leisurely bite to eat.

But it's when you fire up the BRP Rotax engine, carve tight circles into the waves and go flat out in straight lines that you and your three passengers will discover why we call this iconic tender the TurboJet.

SPECIFICATIONS

LOA
2.90m / 9ft 6in

BEAM
1.70m / 5ft 7in

Dry Weight
300kg / 661lbs

Engine
BRP Rotax ACE 900 – 90HP

Overall Height Standard
0.96m / 3ft 2in, 0.80m / 2ft 7in
with removable wheel

Platform kit (tie downs, lifting
strops & over straps)

Towing kit

Electric inflator

Battery charger

Stainless steel anchor

Telescopic paddle

Spray dodger

TURBOJET 325

Thanks to its clever engineering and generous storage, the TurboJet 325 can easily accommodate four adults and keep their essentials dry as you spend a day on the waves.

But press the throttle forward and feel the surge of the Rotax engine coming to life, and all thoughts of how practical the TurboJet is will disappear.

And with a 40-litre fuel capacity, you can be confident that cruising further afield won't be an issue – just make sure you don't forget the wakeboard and water skis.
